

FreeRTOS - Assignment 03

1. Implement a FreeRTOS application with three periodic tasks.

- Requirements
 - Task 1: Toggle LED1 every 500 ms.
 - Task 2: Toggle LED2 every 1000 ms.
 - Task 3: Toggle LED3 every 2000 ms.
 - Use vTaskDelayUntil()

2. Design a FreeRTOS application containing both periodic and aperiodic tasks.

- Requirements
 - Periodic Task
 - Toggle Green LED every 1000 ms.
 - Aperiodic Task
 - Toggle RED LED with 3000 ms interval.

3. Design a FreeRTOS application containing two periodic tasks.

- Requirements
 - Periodic Task1
 - Toggle Blue LED every 1000 ms.
 - Periodic Task2
 - sends count of activation of a task to the UART.
